SUMMARY

AI Engineer with 1 year of experience building production-ready AI/ML and Generative AI solutions, with a strong focus on agentic workflows, RAG pipelines, and scalable AI systems. Skilled in transforming ideas into reliable end-to-end products through strategic system design, rapid prototyping, and cost-efficient engineering. Experienced with Python, SQL, LangChain, LangGraph and AWS with hands-on exposure to deployment, evaluation, API integration, and asynchronous processing. Strong ownership across the development lifecycle, focused on solving complex problems and delivering measurable business value.

SKILLS

Programming Languages: Java, Python, SQL, JavaScript

Generative AI & NLP: Transformers, LLMs, Generative AI, Agentic AI, Prompt Engineering, RAG, Hybrid RAG, AI Agents, Multi-Agent Systems, MCP, Tool Calling, LangChain, LangGraph, CrewAI, Fine-Tuning, LLM Evaluation, Guardrails, LLM Inference, LLM Optimization, FastAPI

Machine Learning: Numpy, Pandas, Scikit-learn, Supervised Learning, Unsupervised Learning, Regression, Classification, Feature Engineering, Feature Selection, Cross-Validation, Hyperparameter Tuning, Hypothesis Testing, Statistical Inference. Model Evaluation, Deep Learning, Neural Networks.

Visualization & Productivity Tools: Power BI,Matplotlib, Seaborn, Plotly, Excel, PowerPoint.

Software & Web Development: Python, React.js, Next.js, TypeScript, FastAPI, REST APIs, Supabase, MongoDB, Git, GitHub, OOP, Data Structures & Algorithms, API Integration, Database Management, Debugging, Testing, Problem Solving

EXPERIENCE

AI Engineer — Grevya Technologies (Feb 2026 – Present)

AI/technology company focused on building AI-driven solutions and intelligent business applications.

- Engineered production-ready AI/GenAI applications using Python, LangChain, LangGraph, RAG, and LLMs, transforming business requirements into automated AI workflows.
- Designed and optimized RAG and agentic workflows using hybrid retrieval, semantic search, prompt engineering, tool calling, evaluation, API integration, and deployment.

Key Project — AI-Powered Order Handover Automation & Knowledge Retrieval Platform (Jun 2026 – Sep 2026)

- Developed a scalable AI-powered Order Handover and Knowledge Retrieval platform that answers customer and product manager queries, replacing manual effort and enabling more autonomous business workflows.
- Implemented hybrid retrieval using BM25 and semantic search with reranking to retrieve relevant information, with evaluation using Precision@K, Recall@K, context relevance, answer quality, and hallucination risk.
- Optimized the RAG pipeline and retrieval strategy, achieving ~60% reduction in generation time while improving contextual grounding, reducing hallucination risk, and enhancing production reliability.

PROJECTS

TRIZEN Photography — Full-Stack Photo Sharing Platform

- Built an event photography platform using Next.js, TypeScript, Supabase, and Tailwind CSS, enabling event creation, team-member assignment, secure photo uploads, and curated customer galleries.
- Implemented role-based authorization with PIN-protected galleries, Supabase Storage, server-side validation, signed photo URLs, and separate Admin, Team Member, and Customer workflows.

Data Science Intern — SISTECHWORK (Nov 2025 – Jan 2026)

- Applying Python, Pandas, NumPy, and machine learning techniques to solve data-driven problems.
- Working on real-time projects and gaining exposure to industry-standard data science workflows.

Web Development Intern - Ascentz Technologies (Jun - Aug 2024)

- Architected responsive web applications using HTML, CSS, and JavaScript for dynamic user interactions.
- Optimized frontend performance and UI design to deliver a seamless user experience.

EDUCATION

BE.COMPUTER SCIENCE AND ENGINEERING **AUG 2022 - APRIL 2026**

Dr.N.G.PITECH **CGPA**-7.5

CERTIFICATIONS

Technical Paper Presentation – (RV College of Engineering, IEEE ICEAMST 2025) Presented research on “AI and IoT-based Smart Adaptive Vehicle Headlight Controlling System” (Nov 2025)

Cloud Computing - (NPTEL, IIT Kharagpur) (Jul - Oct 2024)

DSA Training in Java - (Codingmart Technologies) (Jun 2025)

Technical Paper Presentation - (Sri Ramakrishna Institution) Presented research on "Headlight Automation for Enhanced Safety" (Apr 2024)
