SUMMARY

I am a results-driven and analytical Computer Science Engineering graduate from Dr. N.G.P Institute of Technology, with a strong foundation in full-stack web development and problem-solving. As a full-stack developer, I am passionate about building scalable, efficient, and user-centric applications. I enjoy leveraging data to extract meaningful insights and applying first-principles thinking to design impactful software solutions.

EXPERIENCE

Full Stack Developer Intern – Grevya Technologies (Feb2026 – Jun2026)

- Developing a production-ready **React web application** using reusable components, Hooks, and modern JavaScript.
- Implementing **API integration, routing, and state management**, ensuring seamless user experience and scalable architecture.

Web Development Intern - Ascentz Technologies (Jun - Aug 2024)

- Architected and deployed a responsive, web-based application by leveraging **HTML** for semantic structuring, **CSS** for advanced layout design, and **JavaScript** for implementing dynamic user interactions.
- **Optimized front-end performance** and interface aesthetics through the iterative refinement of design elements, ensuring a seamless and high-quality **User Experience** across the platform

Ruby on Rails Deveoper Intern - Mallow Technologies (Aug- Dec2025)

- Developed and maintained **web applications** using the Ruby on Rails framework, gaining deep expertise in **MVC architecture** and RESTful API design.
- Optimized **database performance** and backend logic through **Active Record and SQL**, ensuring seamless data flow and high-quality user experiences.

PROJECTS

Parking Slot Management System | Ruby on Rails, SQL

- Built a Ruby on Rails parking application with **distance-based slot allocation**, vehicle entry tracking, and booking history management.
- **Implemented database-driven logic** for slot availability, one-entry-per-day validation, and reporting features using Rails best practices.

E-commerce Web Application | React, JavaScript, HTML, CSS

- Developed a responsive **React-based e-commerce application** with product listing, cart management, and **dynamic UI** updates using **React Hooks** and Context API.
- Implemented **client-side routing** and core cart logic, enabling seamless navigation, real-time item tracking, and efficient state management.

Student Management System | Java, OOPs, LLD

- Developed a modular **student management system in Java** using **OOP principles** (Inheritance, Abstraction) for structured and scalable data handling.
- Implemented **encapsulation and Java Collections** to manage student records efficiently, ensuring data consistency and centralized control.

SKILLS

Programming Languages: Java, Python, Ruby, HTML, CSS, SQL, JavaScript (JS)

Technologies: Supabase (Auth, Database), Data Structures and Algorithms(java), Version Control (Git, GitHub, Bitbucket)

Frameworks / Libraries: Numpy, Pandas, React(js), Ruby on Rails

EDUCATION

BE.COMPUTER SCIENCE AND ENGINEERING **AUG 2022 - APRIL 2026**

Dr.N.G.PITECH **CGPA**-7.5

CERTIFICATIONS

Technical Paper Presentation – (RV College of Engineering, IEEE ICEAMST 2025) Presented research on “AI and IoT-based Smart Adaptive Vehicle Headlight Controlling System” (Nov 2025)

Cloud Computing - (NPTEL, IIT Kharagpur) (Jul - Oct 2024)

DSA Training in Java - (Codingmart Technologies) (Jun 2025)

Technical Paper Presentation - (Sri Ramakrishna Institution) Presented research on "Headlight Automation for Enhanced Safety" (Apr 2024)
